

# HAWEKA®

PROPERLY CENTERED IS HALF BALANCED

WHEEL CENTERING SOLUTIONS

## Wire Spoked Wheel Kit

The centering kit for spoke rims

1 case, 2 distance spacer, 1 cone  
2 centering sleeves).

HAWEKA offers special centering sets for spoked wheels for vintage /classic vehicles

These special centering sets were developed to meet the requirements of the current and past history of the automotive industry.

### Product features

Perfect centering with HAWEKA's kit for spoked rims:

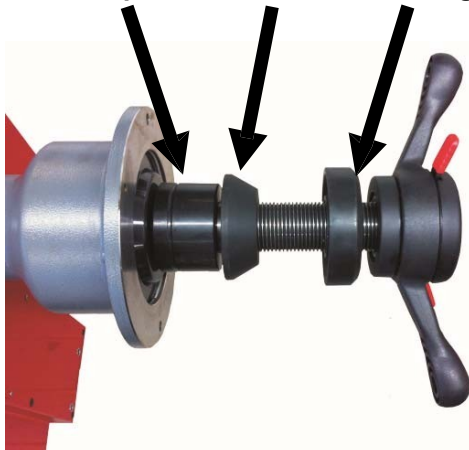

- The centering is done by the center locker
- 2 different sleeves for all kind of spoked rims
- For all common wheel balancing machines (40mm)

Fit the spoked rim on a balancing machine.  
Centering is done by the center locker.

The spacer keeps the distance and the cone is for correct fitment.

**Distance Spacer    Cone    Centering Sleeve**

The distance spacer is critical, a spoked rim does not have a flat surface which can fit up against the wheel balancer back plate..

The spacer keeps the wheel the correct distance and the cone fits in the centre bore The centering is done by the central Locker or centering sleeve on the outside of the rim.

In the set are 2 different sleeves for all kind of spoke rims.
